

Fibrin sealant for retrograde ureteroscopic closure of urine leak after partial nephrectomy. French DB, Marcovich R, Department of Urology, University of Texas Health Science Center, San Antonio, TX.

Authors: Blute M.L.

Publication Date: 2006

Abstract:

We present a case of a prolonged urine leak after partial nephrectomy successfully treated by retrograde ureteroscopic injection of fibrin sealant. The technical aspects of retrograde instillation of sealant into the lower renal pole and outcome are discussed. © 2006 Elsevier Inc. All rights reserved.
