

# **A modified hydroxylapatite implant material. A preliminary report.**

Authors: Bochlogyros P.N., Hensher R., Becker R., Zimmermann E.

Publication Date: 1985

## **Abstract:**

Hydroxylapatite implants are becoming widely used, but this new material is not without its drawbacks. These mainly concern its physical characteristics, complicating and limiting its clinical applications. A method of altering these with fibrin adhesives is described and early laboratory and clinical experience is presented.
