

Commercial fibrin sealants in surgical care. [Review] [42 refs]

Authors: Spotnitz WD

Publication Date: 2001

Abstract:

Fibrin sealants can be a valuable adjunct to surgical procedures. A variety of commercial products have been developed. Specific uses include hemostasis, tissue sealing, and even drug delivery. This review summarizes the components, mechanism of action, and clinical uses of fibrin sealants in modern surgical care. [References: 42]
